WJEC Eduqas GCE A LEVEL in
SOCIOLOGY
ACCREDITED BY OFQUAL

TEACHER HANDBOOK

Teaching from 2015

This Ofqual regulated qualification is not available for candidates in maintained schools and colleges in Wales.
The WJEC Eduqas A level Sociology qualification, accredited by Ofqual for first teaching from September 2015, is available to:

- All schools and colleges in England
- Schools and colleges in independent regions such as Northern Ireland, Isle of Man and the Channel Islands
- Independent schools in Wales.

It will be awarded for the first time in Summer 2017, using grades A*–E.

The Eduqas specification is designed to excite and engage learners and to offer them the skills they require for reflective thinking about the social world. It should challenge their preconceptions and develop in them an awareness of social diversity and understanding of the challenges facing the modern world.

The significance of research is emphasised in the Eduqas specification by its existence as a stand-alone component though candidates should apply their knowledge of research considered in their options to this area of study.

Learners will be encouraged to think in a reflective manner in order to develop the higher level skills of analysis and evaluation. They will be given opportunities to apply their own responses to questions in order to gain transferable skills and prepare them for their place in the social world.

Learners will develop a critical understanding of social structures and social change. In addition, they will discover the importance of social theory and evidence in explaining how modern society has developed into our contemporary society.

Government research has identified that there is a skills gap for people who can use number and apply it to the political organisation and planning of this country. Maths, business studies and statistical analysis would therefore be useful combinations with Sociology.

Additional ways that WJEC can offer support:
- Specimen assessment materials
- Face-to-face CPD events
- Examiners’ reports on each question paper
- Free access to past question papers and mark schemes via the secure website
- Direct access to the subject officer
- Free online resources
- Exam Results Analysis
- Online Examination Review

AIMS OF THE TEACHERS’ GUIDE

The principal aim of the Teachers’ Guide is to offer support to teachers in delivery of the new WJEC Eduqas A level Sociology specification and to offer guidance on the requirements of the qualification and the assessment process.

The guide is not intended as a comprehensive reference, but as support for professional teachers to develop stimulating and exciting courses tailored to the needs and skills of their own students in their particular institutions.

The guide offers assistance to teachers, suggesting possible classroom activities and links to useful digital resources (both our own, freely available, digital materials and some external sources) to provide ideas for immersive and engaging lessons.

The guide will concentrate on those areas new to WJEC subject specifications and those subject areas where guidance has been requested most.
The structure of the specification has been designed to allow learners to focus on contemporary society. There is an emphasis on the acquisition of knowledge to develop a critical understanding of contemporary processes and social change.

The specification structure supports good teaching and learning through promoting a holistic and enquiring approach to the study of sociology. The understanding of sociological concepts, theoretical issues and themes are integrated throughout the specification. By developing such understanding, learners will develop an ability to think sociologically.

This specification guides teachers and learners towards the acquisition of knowledge and understanding of key sociological issues and debates. It is designed to encourage the development of higher order skills such as analysis and evaluation.

As sociology is a dynamic subject, the specification has been developed to promote the inclusion of current sociological issues in the contemporary UK and, where applicable, in a wider global context.

Learners will be challenged to demonstrate their ability to use their sociological knowledge appropriately in varying contexts. In this way the specification allows learners to access opportunities to demonstrate their knowledge whilst at the same time presenting opportunities that stretch and challenge.

The specification has been designed to allow co-teachability at AS and at A level. The emphasis on skills makes this specification an excellent vehicle for the progression of a learner into higher education. Activities based on the specification content will allow learners to respond in non-prescriptive ways through commentary on sociological theories and evidence.

The content has been divided into three components, all of which are assessed by written examination.

At A level, component 1 and component 3 provide the opportunity to study the two themes of socialisation, culture and identity and social differentiation, power and stratification. Through these, learners will develop an awareness of the importance of social structure and social action in explaining social issues. Learners will be studying the material world in which they are living and will also have opportunities to engage with contemporary society in a way that will enhance their sociological understanding.

For example, learners can also develop an understanding of contemporary society by using contemporary examples to support argument/debate, using television, press and other forms of media as the source. They will be expected to reference contemporary sociological research and evidence to support their answers.

Methods of sociological enquiry were previously taught and assessed across a number of units. There is strong evidence from a range of sources that HE values the development of general academic research skills as an important part of preparation for undergraduate study. Component 2 has been designed to facilitate the demand for appropriate research skills from stakeholders and allows for discrete teaching and assessment within a single component.

Learners will be encouraged to support their responses with reference to contemporary examples of sociological research, again emphasising the integrated nature of the specification. Within the specification and particularly in relation to this component, learners are expected to develop both qualitative and quantitative skills and skills of interpretation. Completing small scale research projects of their own will provide learners with the opportunity of first-hand experience of organizing and undertaking a research project. Such a concentrated exercise will enable learners to work through processes of research design and strategy, developing research questions, planning and undertaking fieldwork and analysis, presentation and research evaluation. This in turn will enable them to interpret research by others and apply appropriate methodologies to suggested areas for research.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015
All learners will be assessed on the same three components. In this sense, there are no optional routes through the specification. However, within component 1 and component 3 at A level, the themes have been applied to a range of substantive areas of sociology from which learners may choose (indicated as options on the examination papers). The provision of these areas within the components offers the opportunity for learners to study areas of sociology that are of particular interest to them.

Component 1 – Socialisation, culture and identity

Section B
Learners will be assessed through one of the following substantive areas (options):
- families and households
- youth cultures

Section C
Learners will be assessed through one of the following substantive areas:
- education
- media
- religion

Component 3 – Power and Stratification

Section B
Learners will be assessed through one of the following substantive areas:
- crime and deviance
- health and disability politics
- world sociology

The assessment of each of these areas/options is comparable and has been constructed to give learners access to the same range of sociological content and context.

Within each component, comparability and equivalence in demand are ensured as the content for each area is similar in terms of breadth and depth.

Where there is a choice between questions, the assessment objectives being addressed are comparable. Optional questions will be comparable in demand as indicated by the use of appropriate command words.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
Learners will be assessed on three externally examined components. All assessment objectives are covered within each component and therefore across all components in each examination series.

AO1
The knowledge and understanding aspects of AO1 have been targeted together. Consequently, in line with the technical interpretations, these elements have not been referenced separately in the mark schemes. Elements 1a and 1b are covered by Components 1 and 3. Component 2 targets elements 2a and 2b. The technical interpretation specifies that no more than 5% of the marks for the specification as a whole should be attributed to recall-only items. There are no recall-only items in the sample assessment materials.

AO2
Element 1a has been targeted in Components 1 and 3 and element 1b in Component 2. There will be reasonable coverage of each element in each series of examinations but not in every assessment.

AO3
This assessment objective is assessed across all three components. The mark schemes highlight all three strands of AO3. It should be noted however that responses might not always reach definite conclusions but will still meet the requirement of the strand.

Component 1:
Socialisation, Culture and Identity consists of a range of essay question types. Some require a short open response, some a restricted response, others an extended response. Restricted response essays focus on understanding of basic knowledge through relatively brief and confined written responses and so target AO1 and AO2. Short open responses share the characteristics, but the expected length of response is much shorter (e.g. maybe a paragraph). The shorter length allows several concepts and issues to be covered using this style of question within a single examination. Extended response essays allow learners to construct a variety of interpretations and explanations and draw upon a wider set of information and sources. These questions require learners to demonstrate skills of analysis and evaluation and therefore target AO3, as well as AO1 and AO2.

Component 2:
Methods of Sociological Enquiry consists of scenario based questions, the scenario being a synopsis of a piece of research. The questions ask learners to apply their knowledge to a particular and novel set of circumstances.

Component 3:
Power and Stratification is designed in a similar way to component 1, however the theme and content differs. The restricted response questions target AO1 and AO2; whereas the extended response questions will require learners to develop a debate and therefore their skills of analysis and evaluation (AO3) will be assessed along with AO1 and AO2.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
A range of item types has been used in the assessments:

(i) Short open response questions have been designed to require learners to respond discursively, but are shorter than an essay response. They provide a means of sampling extensively across the content of the specification. All three components feature this type of question.

(ii) Restricted response essays focus on knowledge and understanding with some assessment of the learner’s ability to apply this knowledge and understanding to the specifics of the question. They provide indicative structure or ‘scaffolding’ which will reduce variation in learner response and so reduce the extent of subjectivity in marking. This type of question is found across component 1 and 3. All questions of this style are compulsory.

(iii) Extended response essays have been designed to give learners freedom to demonstrate their ‘sociological imagination’ through their commentary on sociological theories and evidence. Essays are particularly suitable and appropriate to this specification as learners have the opportunity to demonstrate their knowledge and understanding of sociological concepts, theories and evidence and sociological research methods through meaningful and supported analysis and evaluation. They will be used to test higher order skills and a deeper level of understanding. The ability to write in an extended manner, to build and evaluate sociological arguments is a critical skill for learners. This style of question is found in all three components.

Across all examination papers a range of appropriate assessments will be included. In each series a range of question types will be utilised to ensure the knowledge, understanding and skills from the subject content are assessed comprehensively and consistently.

Through a range of structured answers, restricted essays and extended essays learners have to demonstrate a range of skills that shows their understanding and application of a range of sociological concepts, and theories relating to contemporary sociological issues.

Extended response essays throughout all three components will also require learners to demonstrate higher order skills of application, analysis, interpretation and evaluation. For example, learners will be required to demonstrate their ability to analyse and evaluate methods used in sociological investigations.

The assessment of knowledge and skills will also require learners to demonstrate their ability to organise evidence, communicate arguments in a coherent manner, demonstrate an undertaking of theoretical debates and use evidence to support and sustain arguments and conclusions.

There is a common structure across components 1 and 3, comprising of a ‘core’ to be attempted by everybody and other sections which provide a limited amount of choice. This allows learners to address questions on an area for which they feel most prepared.

Learners will be required to demonstrate analytical and evaluative skills in a variety of contexts and to explain and support debate with appropriate concepts theories and research.

The combination of the item types used in the overall assessment in one series gives a suitable and appropriate balance for the assessment of the specification. This range of item types allows learners of differing abilities to demonstrate their knowledge and understanding of the whole specification.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
Example of a short open response question for A level Component 2

**Q1 (a)** Using material from the item and your sociological knowledge, explain what is meant by the positivist approach to research. (5 marks)

- AO1 – Knowledge and understanding (3 marks)
- AO2 – Application (2 marks)

**Q 1 (b)** Explain one reason why the researcher may have wanted to use in-depth interviews in her research. (5 marks)

- AO1 – Knowledge and understanding (2 marks)
- AO2 – Application (3 marks)

Note the variation of weightings for the Assessment Objectives – this is significant in terms of marking.

The mark scheme gives a clear breakdown of how the marks are allocated to the elements in AO1 and AO2.

Example of a restricted response essay for A level Component 3

**Q1 (a)** Identify evidence of social class inequality in two areas of life in the contemporary UK. (5 marks)

- AO1 – Knowledge and understanding (14 marks)
- AO2 – Application (6 marks)

• All questions of this type are compulsory.
• Some may require understanding of an item or analysis of data.
• The focus is on knowledge and understanding with some assessment of learners’ ability to apply knowledge and understanding to the question.
• The questions will provide structure and offer a framework for answers.
• Again, there may be variations in weightings between similar questions on different papers within an exam series but the descriptors will remain similar.
• The AO descriptors and weightings will be the same for the same numbered questions in each summer examination series.

Example of an extended response essay for A level Component 3

**Q5 (c)** Assess sociological explanations of the effects of the media on audiences. (35 marks)

- AO1 – Knowledge and understanding (12 marks)
- AO2 – Application (11 marks)
- AO3 – Evaluation (12 marks)

• The focus is very much on analysis and evaluation rather than just knowledge and understanding.
• Questions such as these assess the ability to write in an extended manner and evaluate sociological arguments, theories and concepts.
• Candidates should structure and frame answers.

**ADDITIONAL RESOURCES**

**Educational Resources > A Level Sociology**

**Eduqas > A Level Sociology > Specification from 2015**

**Eduqas > A Level Sociology > Specimen Assessment Materials**
At AS, although there are only two components, they cover the required themes, acknowledging the co-teachability of AS and A level candidates in that AS candidates learn roughly half the required content within the required timescales.

As a result this gives the AS assessments a natural bias towards AO1 with a reduced AO3 content.

The AOs have been used to develop the assessments so that in Components 1 and 3, the allocation of the percentages in AO1, AO2 and AO3 is reflected in the construction of the item types and the related mark schemes. This is why Components 1 and 3 have a higher percentage weighting across the qualification and are allocated more time.

The assessments in component 2 target the strands and elements which are specific to research methods.

All components encourage the development of critical and reflective thinking.

The balance at AS is within the required weightings and reflects the fewer opportunities for extended writing.

At A level AO1, AO2 and AO3 are covered in equal proportions in Component 1 and 3. Component 2 covers the elements in AO1 and AO2 and the strands of AO3, which discretely target research methods.

Component 2 at both A level and AS discretely targets research methods. This is because methods of sociological enquiry are fundamental to the study of sociology.

These components allow learners to focus on methods of sociological enquiry in order to:

- apply learning through small scale research projects
- design a piece of research in relation to a given brief
- apply knowledge, understanding and skills of research methodology to a novel context.

They also cover an area of study which is significant to the preparation for employment or higher level study, for AS students progressing to A level and particularly for A level students progressing to Higher education courses. As can be seen in the sample assessment materials, the item types and assessments of this component are different at AS and A level.

Assessment at AS requires candidates to demonstrate their knowledge and understanding of research methods.

At A level however candidates will be required to apply their knowledge and understanding through designing a research project which they will be expected to evaluate.
Co-teachability of AS and A level can be demonstrated through coverage of content in the AS and A level in the tables below.

Learners will be required to:
- demonstrate knowledge and understanding of a range of methods and sources of data
- demonstrate their ability to apply their knowledge and understanding of research methods to a specific scenario
- use examples from contemporary sociological research to demonstrate knowledge and understanding of relevant sociological concepts and key methodological issues.

Learners will be required to:
- demonstrate knowledge and understanding of a range of methods and sources of data
- demonstrate their ability to apply their knowledge and understanding of research methods
- demonstrate their ability to design, analyse and evaluate their own research design
- use examples from contemporary sociological research to demonstrate knowledge and understanding of relevant sociological concepts and key methodological issues.
The table below demonstrates the strands and elements for each assessment objective.

### ASSESSMENT OBJECTIVES, STRANDS AND ELEMENTS

#### A01 Demonstrate knowledge and understanding of:
- Sociological theories, concepts and evidence
- Sociological research methods

<table>
<thead>
<tr>
<th>Strands</th>

<tr>
<td><strong>The processes and agencies of socialisation</strong></td>
<td>Knowledge of key concepts and processes of socialisation and the acquisition of identity.</td>
</tr>
<tr>
<td><strong>The influence of socialisation on identity</strong></td>
<td>Learners should also understand that identity can be influenced by gender, class, ethnicity and nationality.</td>
</tr>
</tbody>
</table>

### COMPONENT 1, SECTION B, OPTION 1: FAMILIES & HOUSEHOLDS

<table>
<thead>
<tr>
<th>AREA OF STUDY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Causes and impact of demographic change</strong></td>
<td>Knowledge of demographic change on families and households, and the ability to describe and explain these changes.</td>
</tr>
<tr>
<td><strong>Theoretical debates about the family</strong></td>
<td>Learners are required to evaluate sociological theories of family with reference to research evidence and examples.</td>
</tr>
</tbody>
</table>

### COMPONENT 1, SECTION B, OPTION 2: YOUTH CULTURES

<table>
<thead>
<tr>
<th>AREA OF STUDY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cause and impact of change</strong></td>
<td>Knowledge of the changing nature of youth culture and the ability to explain these changes. The ability to explain the relationship between class, gender and ethnicity and youth cultures is required.</td>
</tr>
<tr>
<td><strong>Theoretical debates about youth culture</strong></td>
<td>Learners are required to evaluate sociological theories of youth culture with reference to research evidence and examples.</td>
</tr>
</tbody>
</table>
At A level, the table below shows how the assessment objectives are distributed across the three assessment components and for the qualification as a whole.

The weighting of assessment objectives for individual components is tailored to the specific assessment requirements and focus of each component.

<table>
<thead>
<tr>
<th>Component 1</th>

The Social Construction of Culture

Key Points:
- An understanding of culture is essential in the study of society
- Learners should be able to explain the social construction of culture through the use of real life examples
- Effective use of evidence and examples enables learners to remain objective during discussions – this is a useful skill to develop

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding
- Reading
- Writing
- Understanding numerical data
- Carrying out calculations
- Interpreting results
- Presenting findings
- Using ICT systems
- Finding, selecting and exchanging information
- Improving own learning and performance
- Developing and presenting information using ICT
- Working with others

Activity Name: Nature or Nurture?

- Search the Internet for video material relating to feral children, such as Oxana Malaya.
- In groups, learners should consider the following questions:
  - What is unusual about Oxana's behaviour?
  - They should suggest reasons for why she acts as she does.
  - How does she differ from other children her age?
- Develop the work by researching other feral children such as Genie Wiley or the Wolf Girls of India.
- What do we learn about the Nature Nurture debate and the role of culture in socialisation from this exercise?
The Processes and Agencies of Socialisation

Key Points:
- Learners should focus on the processes of socialisation
- Learners should be able to refer to examples drawn from a range of different agencies of socialisation for example: the family, education, the media, peer groups and religion
- Learners should understand and use the key concepts and terminology accurately

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding
- Reading
- Writing
- Understanding numerical data
- Carrying out calculations
- Interpreting results
- Presenting findings
- Using ICT systems
- Finding, selecting and exchanging information
- Improving own learning and performance
- Working with others – plan, do and review

INSPIRATION FOR TEACHING

Activity Name: Key Terms Revision Game

- Using index cards or post it notes, ask learners to write key terms on each note. On the reverse they should write the meaning of the term.
- Place the cards with the key terms face up.
- Learners will define as many of the key terms as they can in one minute. Use an egg timer or a phone timer for accuracy.
- If learners are stuck, they can check the meaning of term on the reverse of their card.
- Learners could keep a tally of scores as a record to show improvement.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
The Influence of Socialisation on Identity

Key Points:
- Learners should understand the process of identity formation and how this is connected to the processes of socialisation
- Learners should be aware of the process of acquisition of a variety of identities such as gender, ethnicity, social class and nationality
- Learners should use real life examples to demonstrate understanding

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing; Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Understanding Process of Childhood Socialisation

- Ask learners to view the video clips ‘Playground Drama’ and ‘Luke tries to make friends’ or similar documentary extracts.
- Learners will work in groups and discuss how the children in the clips have learned gender roles from their parents and peer groups using key terms such as: role model, imitation, peer group and sanctions.
- Learners will write sentences using the key terms to explain gender formation and identity or peer group pressure and identity.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
**Causes and Impact of Demographic Change on Families and Households**

**Key Points:**
- Learners should identify the key areas of social and demographic change affecting families
- Learners will be able to offer logical explanations for social and demographic changes that are based on statistical evidence and recent social research
- Learners will consider the implications of demographic change on future society

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing; Understanding numerical data
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

**INSPIRATION FOR TEACHING**

**Activity Name: Marriage Trends**

- Write facts on the whiteboard: Census figures show that there has been a rise in the numbers of never married and unmarried people between 2001 and 2011.
- Learners should be given A3 paper. In groups, they will suggest reasons for this demographic change.
- The suggestions should be pooled between the whole class and judgements made as to the significance of each one as a factor in influencing people’s behaviour.
- For further research, the class can be asked to look at the [website of the ONS](https://www.ons.gov.uk) or newspaper articles where trends in marriage are discussed (see 'List of Related External Resources' link below for related URLs).

**ADDITIONAL RESOURCES**

- [Educational Resources > A Level Sociology](#)
- [Eduqas > A Level Sociology > Specification from 2015](#)
- [Eduqas > A Level Sociology > Specimen Assessment Materials](#)
Theoretical Debates About the Family

Key Points:

- Learners will be aware of the key theoretical debates of the family
- Learners will have knowledge of recent and classical research evidence on which the theories have been based
- Learners will be able to evaluate the usefulness of the theories and research to explain contemporary British Society

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others – plan, do and review.

Inspiration for Teaching

Activity Name: Marriage Trends

- Ask learners in groups of four to summarise the main points of each of the key theories relating to marriage on a sheet of A4 paper: Marxism, feminism, functionalism and post-modernism.
- Learners should look at the image and consider how each theory might explain the rise in gay marriage.
- Individually, learners will each write a paragraph to evaluate one theory. They should make a statement, refer to recent evidence and then refer to the question.
- Back in groups, the learners will create an introduction and conclusion and assemble the paragraphs to create a completed essay.

Additional Resources

- Educational Resources > A Level Sociology
- Eduqas > A Level Sociology > Specification from 2015
- Eduqas > A Level Sociology > Specimen Assessment Materials
**Causes and Impact of Demographic Change on Youth Culture**

**Key Points:**
- Learners should identify the key areas of social and demographic change affecting youth cultures.
- Learners will refer to a variety of youth cultures and to studies documenting those cultures.
- Learners will use concepts described in research studies to offer an explanation of changing youth cultures.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others; plan do and review.

**INSPIRATION FOR TEACHING**

**Activity Name:** Linking Researchers to Key Concepts

- Provide each learner with two pieces of card. On one card, write the name of a researcher. Leave the second card blank.
- The learner will write four sentences about the researcher, using key concepts but not mentioning the name or study on the blank card. Less confident learners may use notes or books to help.
- Collect in all of the cards and then read out the descriptions. Ask the class to identify the researchers or studies from the descriptions.

**ADDITIONAL RESOURCES**

**List of Related External Resources**
Theoretical Debates about Youth Culture

Key Points:

• Learners will be aware of the key theoretical debates with regard to youth culture
• Learners will have knowledge of recent and classical research evidence on which the theories have been based
• Learners will be able to evaluate the usefulness of the theories and research to explain contemporary and past youth cultures

Provides an opportunity to develop the following skills:

Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems; Finding, selecting and exchanging information; Improving own learning and performance; Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Linking Researchers to Key Concepts

• Ask learners in groups of four to summarise the main points of each of the key theories relating to youth culture on a sheet of A4 paper: Marxism, feminism, functionalism and post-modernism.

• Learners should consider how well each theory explains the popularity of boy bands among young people.

• Individually, learners will each write a paragraph to evaluate one theory. They should make a statement, refer to recent evidence and then refer to the question.

• Back in groups, the learners will create an introduction and conclusion and assemble the paragraphs to create a completed essay.

Explanations of Patterns and Trends in Attainment with relation to Class, Gender and Ethnicity

Key Points:
- Learners should identify the key areas of social inequality with reference to social class, gender and ethnicity
- Learners will be able to explain the main patterns and trends
- Learners will understand social reasons for different attainment patterns, including the impact of social policy and the organisation of the education system in the UK

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing; Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others- plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Social Class and Educational Attainment

- Ask learners to view the video clip ‘Split Personality’.
- Ask the class to note as many differences as they can between the two girls in the clip.
- Create a class discussion:
  - Which of the girls is more likely to succeed in school?
  - What reasons can they identify to explain the likely differences in attainment?
  - What cultural factors might make one child more likely to succeed?
  - What differences in their social circumstances (material factors) might make one child more likely to succeed in education?
  - Why are these differences in success levels between social classes important to society?

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
The Influence of Wider Social Factors on Education

Key Points:
- Learners will recognise that educational attainment for different social groups is influenced by a number of social factors, including social and educational policy.
- Learners will have knowledge of recent and classical research evidence to explain differences in educational attainment between various social groups.
- Learners will be able to evaluate the usefulness of the theories and research to explain contemporary and past youth cultures in England and Wales.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others – plan do and review.

INSPIRATION FOR TEACHING

Activity Name: The Influence of Ethnic Background

- Despite having a similar experience of education, these children are likely to have different chances of success based on their ethnic background.
- In groups, on A3 paper, create mind maps to suggest a variety of reasons why children from some ethnic backgrounds may do better or worse in school than others.
- Ask each group to consider which single explanation is most likely in their view.
- Ask each group to justify their choice with reference to recent evidence from research projects and educational statistics into differences in educational attainment on the basis of ethnicity.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Theoretical Debates about Education

Key Points:

- Learners should understand social theories relating to the role and purpose of education in contemporary British society.
- Learners should be able to evaluate the usefulness of those theories to explain differential attainment among differing social groups.
- Learners will use evidence drawn from research and social statistics in order to support or reject theories which explain patterns and trends in educational performance.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Evaluating a Theory - Snowball Activity

- Write a statement on the whiteboard relating to theory: 'Functionalists believe that the education system provides a ladder of opportunity for children'.
- Each learner will write down thoughts supporting and rejecting the idea without reference to other learners, then they share their thoughts with others in the class in groups of two or three, and add to their notes.
- Learners re-form in different groups of two or three and share their thoughts.
- Ask the new groups each to explain one idea that they may have had and write these on the board, saying something in support of each one.
- Ask learners to find evidence from books, notes or the internet to support one of the ideas.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
Key Points:

- Learners should have an understanding of the variety of media products and their significance in cultural life.
- Learners should have an understanding of how different social groups consume media products and are targeted by the media.
- Learners should have an understanding of how different social groups may be represented in the media.
- Learners should be able to use contemporary examples and research to support their understanding.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding; Reading; Writing; Understanding numerical data.
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems.
- Finding, selecting and exchanging information; Improving own learning and performance.
- Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Analysing Media ‘Messages’

- Ask learners to bring a selection of popular magazines to the lesson. They should aim to have magazines they may not normally read, such as newspaper supplements or magazines aimed at different ages and genders from themselves.

- Learners will look at the magazines and make notes relating to the covers of the magazines to suggest who would be interested in the magazines and buy them.

- Learners will carry out a simple content analysis by categorising the images in the magazines according to age, gender and ethnicity.

- What patterns do learners notice with regard to the representation of different social groups? What messages about themselves would readers of the magazines get from reading such material?
The Changing Nature of the Media

Key Points:

- Learners will understand the speed of change and the increasing variety of media technology and consumption
- Learners will understand the changing nature of media ownership and control
- Learners will understand the impact of audience choice on the production of media products
- Learners will recognise the influence of changing patterns of ownership and control on audience taste

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding
- Reading
- Writing
- Understanding numerical data
- Carrying out calculations
- Interpreting results
- Presenting findings
- Using ICT systems
- Finding, selecting and exchanging information
- Improving own learning and performance
- Developing and presenting information using ICT
- Working with others – plan, do and review

INSPIRATION FOR TEACHING

Activity Name: The Changing Nature of Media

- Give learners white board marker pens and ask them to write down any changes in media technology since they were born.
- Ask them to look at the mind map on the whiteboard and suggest other changes in media technology and use since their parents were born.
- What conclusions can they come to about the pace of change in the media?
- What conclusions can they come to about the nature of change in the media?
- Ask learners to predict changes to media over the next twenty years of their lives. What would they like to see happen? What do they think is likely to happen in the future?

ADDITIONAL RESOURCES

- Eduqas > A Level Sociology > Specification from 2015
- Eduqas > A Level Sociology > Specimen Assessment Materials
Theoretical Debates about the Media

Key Points:

- Learners should understand the nature and significance of key debates such as media ownership, representation, audience consumption and news creation.
- Learners will understand and assess the value of the theoretical perspectives used by sociologists to explain the key debates.
- Learners will refer to evidence drawn from recent research and statistics to support their evaluations of the value of the theories.

Provides an opportunity to develop the following skills:

Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems; Finding, selecting and exchanging information; Improving own learning and performance; Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Evaluating a Theory - Personal Diary Activity

- Learners will create a mind map or a list of all the media products that they use in one week, they will estimate:
  - How much time they spend using each item daily and weekly.
  - How much money they spend individually on media products weekly.
  - How much money their household spends on media products monthly.
- Summarise the findings of the group on the whiteboard and estimate how much money is spent monthly by the households of members of the whole class.
- What do these findings suggest to the class about the importance of the media in contemporary social life?

AREA OF STUDY

Explanations of Patterns and Trends in Religious Practices and Beliefs

Key Points:
- Learners should have an understanding of the varieties of religious beliefs and practices and their significance in cultural life.
- Learners should have an understanding of the various concepts used to describe religious beliefs and practices.
- Learners should have an understanding of the differing forms of religious beliefs and practices among different social groups.
- Learners should have an understanding of recent patterns and trends in belief and practice, particularly with reference to social policy, for example, the role of religion in schools or the influence of religious groups on moral issues such as gay marriage and abortion.
- Learners should be able to use contemporary examples and research to support their understanding.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing;
- Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others.

INSPIRATION FOR TEACHING

Activity Name: Using Data

- In preparation for the lesson, read the BBC news article which talks about the difference between religious and spiritual belief.
- Ask learners to write down the names and basic beliefs of religions that they are aware of or which they may practice. They should share their knowledge with others in the class.
- Ask learners to watch the videos, Hare Krishna and Age of Aquarius, or similar videos easily found on social media websites. What spiritual beliefs does this music illustrate?
- As a class, attempt to identify the difference between a spiritual belief and religion.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
The Changing Nature of Religion and the Impact of Social Policy

**Key Points:**
- Learners will understand the changing nature of religious beliefs and practices in contemporary society
- Learners will understand the changing nature of religious influence and behaviour
- Learners will understand the impact of spiritual choice on the beliefs that people hold
- Learners will recognise the influence of changing patterns of belief and practice on current social policy

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding
- Reading
- Writing
- Understanding numerical data
- Carrying out calculations
- Interpreting results
- Presenting findings
- Using ICT systems
- Finding, selecting and exchanging information
- Improving own learning and performance
- Developing and presenting information using ICT
- Working with others – plan, do and review

**INSPIRATION FOR TEACHING**

**Activity Name:** The Influence of Religion on Social Policy

- In advance of the lesson, students may wish to research the ‘Church of the Flying Spaghetti Monster’, or Pastafarianism and look at related news stories.
- Warn learners that they must not mock or offend existing religious belief in the lesson.
- Allow them ten minutes in groups to establish the basic beliefs and moral principles of an invented religion of their choice. Allow them to be creative and unusual in their suggestions.
- Learners may make short presentations to the whole class in order to gain followers for their new religions.
- Learners must now apply the principles of their newly created religions to significant moral questions of the day: abortion, gay marriage, or any topical discussion.
- How have the principles of their invented religions affected their choices?
- Should some people’s religious beliefs be allowed to influence the behaviour and moral choices of non-believers?

**ADDITIONAL RESOURCES**

- Educational Resources > A Level Sociology
- Eduqas > A Level Sociology > Specification from 2015
- Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Theoretical Debates about Religion

Key Points:

- Learners should understand the nature and significance of key debates such as secularisation, the relationship between religion and broader social structures such as ethnicity, gender, age and class, spirituality and belief.
- Learners will understand and assess the value of the theoretical perspectives used by sociologists to explain the key debates.
- Learners will refer to evidence drawn from recent research and statistics to support their evaluations of the value of the theories.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding; Reading; Writing; Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Evaluating a Theory – Explaining Religious Ceremonies

- Ask learners in groups of four to summarise the main points of each of the key theories relating to religion on a sheet of A4 paper: Marxism, feminism, functionalism and post-modernism.
- Learners should look at an image which shows a Maori warrior from New Zealand participating in a Haka or tribal spiritual war dance (or a similar spiritual ceremony). As a group they will consider how well each theory explains group participation in religious practice.
- Individually, learners will each write a paragraph to evaluate one theory. They should make a statement, refer to recent evidence and then refer to the question.
- Back in groups, the learners will create an introduction and conclusion and assemble the paragraphs to create a completed essay.

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
Key Concepts in Methods of Sociological Enquiry

Key Points:
- Learners should have an understanding of the significance of research methodology to the study of sociology
- Learners should recognise that there cannot be a perfect piece of research; all research has both strengths and weaknesses which affect its value as evidence
- The key concepts for the evaluation of the quality of research include: validity, reliability and ethics. Learners will be expected to understand these concepts and other terminology.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing;
- Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Evaluating Research

- Ask learners to view the video clip ‘Gang Leader for a Day’.
- Ask learners to list the research decisions Sudhir Venkatesh made when designing and carrying out his research.
- Ask learners to evaluate the quality of the research using the following criteria:
  - What do we learn that is new about the lives of gang members?
  - If the research was carried out again, would the findings be exactly the same or similar (reliability)?
  - How truthful and accurate a reflection of the lives of gang members is Venkatesh’s research (validity)?
  - How could Venkatesh or others have been harmed by this piece of research (ethics)?
  - What do learners understand about the difficulty of conducting social research on real people in real social situations?

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Key Points:
- Learners will understand and assess the differences between quantitative and qualitative approaches to research.
- Learners will describe quantitative methods and sampling procedures and assess their relative strengths and weaknesses.
- Learners will describe qualitative methods and sampling procedures and assess their relative strengths and weaknesses.
- Learners will demonstrate their understanding with reference to research evidence and examples.

Provides an opportunity to develop the following skills:
Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems; Finding, selecting and exchanging information; Improving own learning and performance; Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Evaluating Research

- Ask learners to suggest different ways of finding out information about different groups of people around them. Encourage imaginative methods.
- The main methods will include: asking people directly, watching them, looking up records about them, looking at photographs and historical records about them, using magazines or social media, or looking in their diaries and personal papers. Other methods are possible.
- For each method suggested by learners, ask others in the group to consider:
  - What are the main features of the method?
  - Why would you use that method?
  - What kind of information would that method give you?
  - What would be the advantages of the method?
  - What would be the disadvantage of the method?

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Applied Research Design

Key Points:
- Learners will understand the process of research design
- Learners will use theoretical understanding to create a research design and justify decisions
- Learners will use theoretical understanding to evaluate their own research designs
- Learners will use theoretical understanding to evaluate research designs from classical and contemporary published research

Provides an opportunity to develop the following skills:
Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems; Finding, selecting and exchanging information; Improving own learning and performance; Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Designing Research

- Suggest a topic that is current to the class, something that is of interest or related to the options chosen for study.

- The following headings will be written on the whiteboard:
  - Operationalise key terms
  - Select the method
  - Ethical considerations
  - Sample population and procedure
  - Pilot study
  - Process of research.

- In pairs, learners will design a simple research project using the headings.

- Learners will form new pairs to work with another learner who has attempted a different research design. Each will criticise, praise and suggest improvements to the design of the other learner.

- Learners will return to their original pairs and improve their designs taking into account the criticisms that they have heard and the suggestions that have been made.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Evidence of Social Inequality

Key Points:
- Learners should collect and use evidence of social inequality in relation to social class, gender, ethnicity and age
- Learners will cite a range of evidence and examples based on an understanding of inequality in contemporary British society
- Learners will use statistical and research evidence to show understanding of how inequality may affect social groups

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing; Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: ‘Breadline Britain’

- Ask learners to view a segment of the video clip ‘Breadline Britain’, or to look at recent documentaries that show life among the poor in Britain.
- Learners should work in small groups or pairs to discuss what they have learned from the video and their responses to it. Encourage learners to be imaginative in their responses:
  - In what conditions do the people in poverty live?
  - What social factors contribute to the poverty of the people shown?
  - Could these people have avoided being poor?
  - How could they solve the problems caused by their poverty?
  - How could the government help these people out of poverty?

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials
Patterns of Inequality

**Key Points:**
- Learners will be able to demonstrate understanding of social inequality in contemporary Britain
- Learners will demonstrate their understanding with reference to sociological research evidence and official statistics collected by government agencies

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing;
- Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

**INSPIRATION FOR TEACHING**

**Activity Name:** Patterns of Inequality in Modern Britain

- Learners to consider how they would research and gather evidence of social inequality in contemporary Britain by using secondary sources of data.
- Each learner, or pair of learners, will focus on one specific area of social life, for example: education, work, media, health, welfare, crime, family.
- Learners will use ICT and textbooks to gather statistical evidence of social inequality in their chosen area.
- Learners will gather data relating to particular social groups on the basis of gender, ethnicity, age and class.
- Learners will develop their work by looking at government data on inequality in modern Britain or following other links provided (see the 'List of Related External Resources' link below for URLs).
- Learners will create and present a short PowerPoint presentation on their area of inequality using the data that they have gathered.
- The whole class will have access to the completed work.

**ADDITIONAL RESOURCES**

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Theories of Inequality

Key Points:
• Learners will understand the theories used by sociologists to explain the existence of poverty and inequality
• Learners will evaluate theories of inequality
• Learners will use evidence drawn from sociological research evidence and statistical data in order to assess the usefulness of sociological theories that explain inequality

Provides an opportunity to develop the following skills:
Speaking, listening and understanding; Reading; Writing; Understanding numerical data;
Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
Finding, selecting and exchanging information; Improving own learning and performance;
Developing and presenting information using ICT; Working with others – plan, do and review.

INSPIRATION FOR TEACHING

Activity Name: Creating a Revision Poster

- Ask the class to work individually, each with a large piece of paper and some pens. Each learner will be given the name of a theorist or a type of theory which they should evaluate.
- Working as individuals, the learners will create a mind map of what they know about their theory using as few words as possible (set a maximum limit). They can use images. They may need or want to use their class notes for this part of the exercise. Allow 10 minutes.
- Alternatively the class may work on one theory together using the whiteboard and photographing the finished mind map with their phones.
- When the learners have completed their work, they will swap mind maps with each other and add strengths and weaknesses of the theory on the paper in front of them, not their allocated theory.
- The mind map will be returned to the original learner who may add other points to the work in front of them, but must stick to the word limit.
- The papers can now be used as the basis of a short essay-writing exercise but will be the only stimulus available for the learners to use.

</thead>
<tbody>
<tr>
<td><strong>Measuring crime</strong></td>
<td>Learners should understand that crime is socially constructed. There are three ways in which crime statistics may be gathered: victim studies, self-report studies and official statistics. Learners should know and be able to describe the strengths and weaknesses of each method. Learners should also understand the relationship between the media and social perceptions of crime.</td>
</tr>
<tr>
<td><strong>Patterns, trends and the social distribution of crime and deviance</strong></td>
<td>Learners are required to understand the relationship between social class, gender, ethnicity and age in patterns of crime and deviance. Learners are also required to understand the role of the media in the social construction of crime and deviance.</td>
</tr>
<tr>
<td><strong>Theories of crime and deviance</strong></td>
<td>Learners are required to evaluate theories of crime and deviance and to use evidence and examples to support argument.</td>
</tr>
</tbody>
</table>

### COMPONENT 3, SECTION B, OPTION 2: HEALTH AND DISABILITY

<table>
<thead>
<tr>
<th>AREA OF STUDY</th>
<th>DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>The social construction of health and disability</strong></td>
<td>There are a variety of ways in which health and disability may be understood. Knowledge of definitions of health and disability and the role of health professionals applying these terms to people is necessary.</td>
</tr>
<tr>
<td><strong>Patterns, trends and the social distribution of health and disability</strong></td>
<td>Learners are required to understand the relationship between social class, gender, ethnicity and age and patterns and trends in health and disability. Learners are also required to understand the impact of social policy in relation to the experience of health and disability.</td>
</tr>
<tr>
<td><strong>Theories of health and disability</strong></td>
<td>Learners are required to evaluate theories of health and disability and to use evidence and examples to support argument.</td>
</tr>
</tbody>
</table>
Measuring Crime

Key Points:

- Learners will know and understand current patterns and trends of crime relating to gender, ethnicity, class and age.
- Learners will be able to explain current patterns and trends of crime relating to gender, ethnicity, class and age.
- Learners will demonstrate understanding of the strengths and limitations of the various methods used to collect data relating to crime and deviance in the UK.
- Learners will understand the relationship between media reporting and perceptions of crime and crime statistics.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding; Reading; Writing; Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others.

INSPIRATION FOR TEACHING

Activity Name: Methods of Data Collection

- Learners consider the tables from the ONS CSEW 2015, or any other tables referring to official crime statistics.
- Learners should summarise the patterns and trends that are shown on the graph.
- Learners will suggest reasons for the patterns and trends that are shown on the graph:
  - Why do people need to gather statistics about crime in their neighbourhood?
  - Why do people need to gather national crime statistics?
  - How might the way that crime statistics are gathered affect the findings?
  - How does studying the information in the graph alter your view of crime?
  - What social factors may influence your view of the amount of crime that is taking place in society?

ADDITIONAL RESOURCES

- Eduqas > A Level Sociology > Specimen Assessment Materials
COMPONENT: 3B
EXAM LEVEL: A LEVEL

AREA OF STUDY
Patterns, Trends and the Social Distribution of Crime and Deviance

Key Points:
- Crime statistics show that there are very different distributions of crime and victimisation for people in different social groups based on age, class, gender and ethnicity
- Learners should explain why the patterns and trends in criminal behaviour and crime rates vary for different social groups

Provides an opportunity to develop the following skills:
Speaking, listening and understanding; Reading; Writing;
Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
Finding, selecting and exchanging information; Improving own learning and performance;
Developing and presenting information using ICT; Working with others - plan do and review.

INSPIRATION FOR TEACHING

Activity Name : Summaries of Sociologists Working in the Field of Gender and Crime

- Write on the board, ‘Men are more likely to be convicted of crime than women. In 2013, women accounted for 4.6% of the prison population.’
- Each learner will be given a piece of A4 paper and will write one suggestion to explain this fact at the top of the paper.
- Learners will swap papers, read what has been written and add another idea.
- The process of swapping and writing will continue until there are at least ten ideas in different handwriting on each sheet of paper. Summarise these ideas on the whiteboard.
- Learners will then use textbooks, the internet and notes to discover what research has been carried out to explain why crime is a male activity, and link research to the ideas written on the paper.
- The paper lists can be used to form the basis of an essay explaining differences in crime rates between men and women.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Theories of Crime and Deviance

Key Points:

• There are a variety of theories to explain why criminal and deviant behaviour occurs; learners will know and understand these theories
• Learners will be able to evaluate the usefulness of theories to explain crime and deviant behaviour
• Learners will use recent research evidence and statistical data to evaluate the usefulness of the theories

Provides an opportunity to develop the following skills:

Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems; Finding, selecting and exchanging information; Improving own learning and performance; Developing and presenting information using ICT; Working with others; plan do and review.

INSPIRATION FOR TEACHING

Activity Name: Group work on solutions to crime and deviance

• Learners watch an extract of the music video *Bingo Players ft. Far East Movement – Get up*.
• In groups of four, learners will produce a list of suggestions for dealing with the problem of crime. Learners will be encouraged to be imaginative and consider all kinds of possibilities, including crime prevention and strict punishment regimes.
• The learners will then create a table and consider one strength and one weakness of each suggestion:
  • Why is it necessary to have social control?
  • What have the class learned about the issue of solving the problem of crime?
• The class will now be asked to research Left and Right Realist solutions to the problem of crime, and judge which approach they feel is most effective and why.

The Social Construction of Health and Disability

Key Points:

- Learners will demonstrate understanding of the key terms used in the study of health and disability and be able to use the terms with accuracy.
- Learners will recognise that many terms such as health and disability are contested concepts linked to specific theories and debates.
- Learners will know and understand current patterns and trends of health relating to gender, ethnicity, class and age.
- Learners will be able to explain current patterns and trends of health relating to gender, ethnicity, class and age.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others.

INSPIRATION FOR TEACHING

Activity Name: Development of Key Concept Booklet

- Ask learners to define what is meant by the following terms: health, disease, well-being, disability and sickness.
- Write the following WHO definition on the whiteboard for the class to consider: ‘Health is a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.’
  - How useful is this definition of health? Make points for and against.
  - How many people in the class are healthy according to this definition?
  - How could the definition of health be improved?
- In the light of the discussion, how could the definitions that the class suggested be improved?
- The class will make up a revision booklet or set of index cards of key terms using websites, textbooks and class notes.

ADDITIONAL RESOURCES

List of Related External Resources
Patterns, Trends and the Social Distribution of Health and Disability

Key Points:

• Health statistics show that there are very different distributions of health and disability for people in different social groups based on age, class, gender and ethnicity.
• Learners should explain why the patterns and trends in health and disability rates vary for different social groups.
• Learners should be aware of recent reports and research findings into the health of the nation.

Provides an opportunity to develop the following skills:

Speaking, listening and understanding; Reading; Writing; Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems; Finding, selecting and exchanging information; Improving own learning and performance; Developing and presenting information using ICT; Working with others; plan do and review.

INSPIRATION FOR TEACHING

Activity Name: Reports on Health Inequalities

• Write on the board, "Those born in the most deprived areas of the country spend 30% of their short lives in poor health, whilst those born in the wealthiest social groups spend 15% of their longer lives in poor health."
• Each learner will be given a piece of A4 paper and will write one suggestion to explain this fact at the top of the paper.
• Learners will swap papers, read what has been written and add another idea.
• The process of swapping and writing will continue until there are at least ten ideas in different handwriting on each sheet of paper. Summarise these ideas on the whiteboard.
• Learners will then use textbooks, the internet and notes to discover what research has been carried out to explain why poverty seems to be related to ill health and link research to the ideas written on the paper.
• The paper lists can be used to form the basis of an essay explaining differences in health rates between the rich and the poor.

ADDITIONAL RESOURCES

Educational Resources > A Level Sociology

Eduqas > A Level Sociology > Specification from 2015

Eduqas > A Level Sociology > Specimen Assessment Materials

List of Related External Resources
Theories of Health and Disability

Key Points:
- There are a variety of theories to explain differences in health and disability; learners will know and understand these theories with reference to both material and cultural explanations.
- Learners will be able to evaluate the usefulness of theories to explain variations in the experience of health and disability.
- Learners will use recent research evidence and statistical data to evaluate the usefulness of the theories.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing;
- Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others; plan do and review.

INSPIRATION FOR TEACHING

Activity Name: Material vs Cultural Factors as a Cause of Health Inequality

- Ask learners to view the video clips Health Inequalities and the Glasgow Effect and The North South Divide, or similar documentaries.
- Divide the class into small groups and ask half of them to identify material factors from the videos that affect health; the other half should identify cultural factors (aim for at least 4 of each with relevant sociologists attributed).
- Lead a whole class debate on the two explanations, ensuring that all arguments are supported with evidence. Adopt an integrated point-by-point approach ensuring that evaluation is sustained throughout the debate.

</tr>
</tbody>
</table>
Patterns and Trends in Political Participation

Key Points:

- Learners will demonstrate understanding of the key terms used in the study of politics and be able to use the terms with accuracy.
- Learners will recognise that many terms from the sociology of policy are contested concepts linked to specific theories and debates.
- Learners will know and understand current patterns and trends of political participation relating to gender, ethnicity, class and age.
- Learners will be able to explain current patterns and trends of political participation relating to gender, ethnicity, class and age.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding; Reading; Writing;
- Understanding numerical data; Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others.

Activity Name: Political Participation

- Divide the class according to some random characteristic such as gender, hair length, eye colour etc. Inform the class that only those who fit a particular characteristic will be allowed to speak in the lesson. Those learners who fit into the special characteristic group will be able to say what the homework will be or what time the lesson ends.
- Carry out a simple ballot among only the participating group to make a decision on homework – it can be quite unfair and the more unfair, the better.
- Class discussion in groups and then a whole class discussion:
  - Was the voting system fair?
  - Did the vote reflect the views of everyone, or just the minority group?
  - To what extent did the exercise reflect the practice of voting in contemporary British society?
  - What would society be like if certain groups (for example, the poor, women, members of ethnic minorities, people with low income, those without jobs) were not allowed to vote?

Additional Resources

The Role of Parties, Pressure Groups and New Social Movements

Key Points:

- Learners should understand the role of political parties in British society.
- Learners should understand that many people no longer belong to political parties but choose instead to become part of pressure groups and new social movements.
- Learners should demonstrate understanding of the influence of these different political groupings on the democratic process.
- Learners should be able to refer to actual examples of the influence of parties, pressure groups and new social movements on the political and democratic process.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others.

Activity Name: Should We Belong to Political Parties?

- Write on the board, ‘According to government statistics, in 2015, less than one percent of the electorate is a member of a political party. In 1983, 3.8% of the electorate were members of political parties.’
- Learners will be divided into groups of four, and each group will be given large sheets of paper. Half of the class will be asked to mind map ideas to explain why people should belong to political parties. When they have done this, they should share their ideas with others on the same side of the argument.
- The other half of the class will be asked to mind map ideas to explain why people should not belong to political parties. When they have done this, they should share their ideas with others on the same side of the argument.
- The class will now pair off, with learners who argued against political parties paired with those who had the opposing view. They will debate their cases with reference to recent political events.
- The class will convene and you should summarise the key points for the class.

Theories of Power and Politics

Key Points:

- There are a variety of theories to explain differences in political participation; learners will know and understand these theories with reference to recent political events.
- Learners will be able to evaluate the usefulness of theories to explain variations in participation in political activity.
- Learners will use recent research evidence and statistical data to evaluate the usefulness of the theories.

Provides an opportunity to develop the following skills:

- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others.

**INSPIRATION FOR TEACHING**

**Activity Name:** Market Place Activity for Theories of Power

- The learners are to be given access to their notes and to books and websites in an attempt to define the meaning of power.
- In groups, each set of learners is to research one theory of power: Marxism, Weberianism, Lukes, Parsons and modernisation theory.
- The group will create a simple poster or learning resource with very few words, many images and ideas.
- When the posters are complete, the groups will split. One person will remain with the poster and become a ‘teacher’ of the ideas of their group research topic. The remainder of the group become ‘learners’.
- The ‘learners’ will spread out around the class and be taught the ideas of other theorists as discussed by other groups. ‘Learners’ may make notes and question the ‘teachers’ on another theory.
- The groups will reconvene and each will teach what they have learned to their learning partners.
- The learning posters can be left in the room as wall display work.

Patterns and Trends of Social Inequality

**Key Points:**
- Learners will demonstrate understanding of the key terms used in the study of world sociology and be able to use the terms with accuracy.
- Learners will recognise that many terms from world sociology are contested concepts linked to specific theories and debates.
- Learners will know and understand current patterns and trends of global inequality relating to gender, ethnicity, class and age.
- Learners will be able to explain current patterns and trends of global inequality relating to gender, ethnicity, class and age.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding;
- Reading;
- Writing;
- Understanding numerical data;
- Carrying out calculations;
- Interpreting results;
- Presenting findings;
- Using ICT systems;
- Finding, selecting and exchanging information;
- Improving own learning and performance;
- Developing and presenting information using ICT;
- Working with others – plan, do and review.

**INSPIRATION FOR TEACHING**

**Activity Name: Cheap Fashion and Global Inequality**

- Ask learners to look at the labels in their clothing and personal items. Produce a list on the whiteboard of where they were made, identifying where the countries are in the world.
- Ask learners to view a segment of the video clip 'The Full Story of the Rana Plaza Factory Disaster', a similar documentary that discusses sweatshop exploitation of workers.
- What are the benefits of working in sweatshops for people in less developed countries?
- What are the disadvantages working in sweatshops for people in less developed countries?
- What are the benefits of buying goods made by sweatshop labour for people in economically well developed countries?
- How could people in economically well developed countries best support the workers in sweatshops?

**ADDITIONAL RESOURCES**

**Eduqas > A Level Sociology > Specification from 2015**

**Eduqas > A Level Sociology > Specimen Assessment Materials**

**List of Related External Resources**
The Impact of Globalisation and Aid

Key Points:
- Learners should understand the role of transnational corporations, world trade, globalisation and aid.
- Learners should understand that global inequalities in wealth and power limit the lives of people in less economically developed regions of the world.
- Learners should demonstrate understanding of the influence global economic structures on the distribution of wealth in the world.
- Learners should be able to reflect on the value of Western aid to less economically developed regions of the world.
- Learners will use evidence and examples of the impact of aid and trade in their responses.

Provides an opportunity to develop the following skills:
- Speaking, listening and understanding; Reading; Writing;
- Understanding numerical data;
- Carrying out calculations; Interpreting results; Presenting findings; Using ICT systems;
- Finding, selecting and exchanging information; Improving own learning and performance;
- Developing and presenting information using ICT; Working with others – plan, do and review.

Activity Name: Role-Playing Aid Workers

- Show the class the video clip Russell Brand visits Kibera the largest slum in Africa.
- How does the life of the children in Kibera (a slum of over 1,000,000 people in Kenya) differ from the experience of life among British children?
- Learners should list the problems of Kibera and then prioritise them based on the order in which aid money should be spent.
- Learners will now form groups of three. Each learner will take on a different role: one is to be a resident of Kibera, one is a government official from Kenya, and one is a British aid worker. In their assumed roles they will then consider how best to help people of Kibera – should aid workers focus their efforts on: water, sewage, sexual health, medical facilities for people with AIDS, general health issues, housing, education, creating employment or other issues?
- Learners will justify their answers with reference to evidence and their understanding of global inequality.
